

Project Assignment (II)

- System (Application) Under Test - <https://restful-booker.herokuapp.com/>
- Create a Collection including following Requests:
 1. A booking consisting following body format:

```
{ "firstname": "<valid.value>",  
  "lastname": "<valid.value>",  
  "totalprice": "<valid.value>,,  
  "depositpaid": <valid.value>,,  
  "bookingdates":  
    { "checkin": "<valid.value>",  
      "checkout": "<valid.value>" },  
  "additionalneeds": "<valid.value>" }
```

Get the 'bookingid' from the response and pass this parameter to the next requests to check.

2. Check the booking created in the first request and verify that the firstname and lastname are correct.
3. Delete that booking.
4. Verify that the booking deleted.

Please provide a brief explanation of the test infrastructure you established as a resulting report. You can find the API information at <https://restful-booker.herokuapp.com/apidoc/index.html>.
